

Job title: Junior Developer
Reports to: CarePortal Chief Innovation Officer
Position: Full-time exempt
Location: Remote or Headquarter office, Kansas City, MO

Why apply for this job?

You would love this role if you are passionate about seeing technology used to serve people and expand the Kingdom of God.

The technology you build will directly impact keeping real families together. Even the smallest bug fixed helps “the least of these” - families desperately in need of hope, help and the love of Jesus Christ - to be met with selfless actions taken by the local church. These actions are only made possible through your work.

You will be expected to bring your highest level of excellence with an attitude of humility that thinks of others more often than yourself. You will work independently and take ownership of your tasks while also submitting as a servant to your coworkers. You will be challenged to stretch your thinking, your faith and your service. And if we may be so bold, our hope through it all is that you see Jesus more.

What you do matters. Welcome to The Global Orphan Project.

Who is the Global Orphan Project?

The Global Orphan Project (GO Project) is a Kansas City based 501c3 nonprofit committed to serving vulnerable kids and families through the local church and people who care.

CarePortal is a ministry platform that supports an interdenominational network of Churches, businesses, people who care, and child serving agencies for the good of children and families in crisis in their community. This network is supported by a team that develops relationships, infrastructure, and technology to empower each participating church. The goal is transformation in the lives of hurting children/families, the Church, and child welfare. Learn more at www.careportal.org.

The right candidate is a proven, productive, IT professional specialized in developing web applications using any web-scripting or object-oriented programming language (such as PHP, Java, C#, Python, NodeJS, TypeScript, Dart) for 1 year. This developer will be part of a growing tech team designed to make CarePortal a world class platform that serves children around the world. One day CarePortal will serve millions of children globally.

This is a full-time position with GO Project benefits. Salary is commensurate with relevant skills and experience.

What will you do?

- Create new innovative, state-of-the-art software features
- Write code in PHP, Laravel, SQL and Javascript
- Maintain existing PHP Laravel applications for our proprietary software CarePortal and database
- Regularly test your own features and the features of other developers
- Assist with mobile app development as time and interest allows

What is expected of you:

- Committed to following Jesus and mobilizing others to serve His Kingdom
- Passionate about empowering local churches to care for children and families in crisis
- Commitment to GO Project's Mission and Core Values
- Creative and efficient problem solver
- 1 year minimum experience in a web-scripting or object-oriented programming language such as PHP, Java, C#, Python, NodeJS, TypeScript, Dart
- 1 year minimum experience with HTML/CSS/LESS/SASS
- Communicate progress and roadblocks effectively and quickly
- Collaborate well with the entire team (developers, support, field team, marketing, etc)
- Keep abreast of new trends and best practices in web development
- Be dependable

Other stuff we love to see:

- Regular acts of service and humility beyond mere coding skills
- Actions that raise the operating level of the entire team
- Any experience or exposure to SQL, database scripting, database design
- Any experience with quality assurance testing within a tech team
- Any experience with Javascript frameworks
- Any experience using programming to create new features, not simply maintain existing ones
- College degree in a technical discipline (STEM)

The Global Orphan Project is a 501c3 non-profit located at 3161 Wyandotte, Kansas City, MO 64111. GO Project associates are at-will employees.
