Job title: **Senior Developer**
Reports to: **CarePortal Chief Innovation Officer**
Position: **Full-time exempt**
Location: **Remote or Headquarter office, Kansas City, MO**

Why apply for this job?

You would love this role if you are passionate about seeing technology used to serve people and expand the Kingdom of God.

The technology you build will directly impact keeping real families together. Even the smallest bug fixed helps "the least of these" - families desperately in need of hope, help and the love of Jesus Christ - to be met with selfless actions taken by the local church. These actions are only made possible through your work.

What you do matters. Welcome to The Global Orphan Project.

Who is the Global Orphan Project?

The Global Orphan Project, Inc. is a Christian nonprofit ministry with a mission to break the orphan cycle through the power of community, commerce, and the love of Jesus Christ. We carry out our mission by equipping and empowering local churches to care for children and families in crisis. We are seeking candidates who understand and are enthusiastic about advancing our organizational mission.

CarePortal is a ministry platform that supports an interdenominational network of Churches, businesses, people who care, and child serving agencies for the good of children and families in crisis in their community. This network is supported by a team that develops relationships, infrastructure, and technology to empower each participating church. The goal is transformation in the lives of hurting children/families, the Church, and child welfare. Learn more at www.careportal.org.

The right candidate is a proven, productive, IT professional specialized in developing web applications using object-oriented programming language such as PHP, Java, C#, Python for 5+ years. Experience developing and supporting native mobile apps and API integrations will go a long way.
The Developer will be part of a growing tech team designed to make CarePortal a world class platform that serves children around the world. One day Careportal will serve millions of children globally.

This is a full-time position with GO Project benefits. Salary is commensurate with relevant skills and experience.

What will you be doing?

- Develop, record and maintain cutting edge web-based PHP applications on our proprietary software CarePortal and database
- Build innovative, state-of-the-art applications and collaborate with Marketing, Communications and Finance teams
- Ensure coding style and standards are consistent across applications
- Prepare and maintain all applications utilizing standard development tools
- Utilize backend data services and contribute to increase existing data services API
- Lead the entire web application development life cycle right from concept stage to delivery and post launch support
- Convey effectively all task progress, evaluations, suggestions, schedules along with technical and process issues
- Document the development process, architecture, and standard components
- Collaborate regularly with fellow team members including support staff and junior developers.
- Keep project manager well informed of the status of development effort and serve as liaison between development staff and project manager
- Keep abreast of new trends and best practices in web development

What is expected of you:

- Passionate about empowering local churches to care for children and families in crisis
- Commitment to GO Project's Mission and Core Values
- Creative and efficient problem solver
- Experience in an object-oriented programming language such as PHP, Java, C#, Python for 5+ years.

Other stuff we love to see:
- Regular acts of service and humility beyond mere coding skills
- Actions that raise the operating level of the entire team
- Experience developing and supporting native mobile apps (Flutter, React Native strong plus)
- Experience developing and supporting API integrations
- Hands on experience with SQL schema design, SOLID principles, REST API design
- Unit & Integration testing (PHPUnit, PHPSpec, Behat, Dusk)
- MySQL profiling and query optimization
- BS/MS degree in Computer Science, Engineering, MIS or similar relevant field experience

The Global Orphan Project is a 501c3 non-profit located at 3161 Wyandotte, Kansas City, MO 64111. GO Project associates are at-will employees.
